About

Frontend Developer with 4 years of experience specializing in the design and development of high-performance web and mobile applications. Focused on creating intuitive, scalable, and user-centric interfaces using React and React Native. Professional English level (C1).

Experience

Mobile Developer

Ivy | February 2025 - Present

- Developed a cross-platform mobile application for event management using React Native, TypeScript, and NativeWind, optimizing the UX for organizers and vendors.
- Integrated and consumed Supabase as a Backend as a Service from the frontend for authentication, database management, Storage, and server logic with Edge Functions.
- Integrated Wompi payment gateway and Google Maps API to enable secure financial transactions and real-time geolocation features.
- Managed automated deployments to the App Store and Google Play using EAS, streamlining the application delivery lifecycle.

Frontend Web/Mobile Developer

Piyion | June 2022 - Present

- Developed scalable web applications using React, TypeScript, and Firebase, improving maintainability and performance.
- Built and deployed a cross-platform mobile application with React Native, enhancing accessibility and user engagement.
- Managed manual deployments using Firebase Hosting, ensuring seamless production releases.
- Optimized API consumption and UI rendering to improve overall user experience.
- Collaborated with multidisciplinary teams to enhance product features and implement development best practices.

Education

B.S. in Systems Engineering and Computer Science

Pontificia Universidad Javeriana - Cali, Colombia | 2018 - 2022

Skills

Languages

JavaScript, TypeScript, HTML, CSS, SCSS

Libraries & Frameworks

React, React Native, Redux, Zustand, TailwindCSS, NativeWind

Tools & Platforms

Firebase, Supabase, Git, GitHub, Figma, Expo, EAS

Projects

Alle Shop

React · TypeScript · TailwindCSS · Firebase

E-commerce application featuring user authentication, shopping cart management, and a favorites list.

Flashcard app

React · TypeScript · TailwindCSS · Redux

Interactive web application for studying with flashcards, including progress statistics.

Markdown editor

React · TypeScript · TailwindCSS

Real-time text editor with Markdown syntax support, local storage, and dark/light mode toggle.
